

About Chemtex

Chemtex Speciality Limited is a public limited organization registered under Company's Act 1956. It is an SME registered company and is a leading manufacturer of Speciality Chemicals and holds various licenses, approval and certifications such as Drug License, FSSAI License, ISO 9001, EMS 14001, OHSAS 18001, GMP, FDA and CE.

The company was founded in the year 1970 and has served over 24,000 clients worldwide.

This year which happens to be our 50th anniversary year we served the entire Nation with our wide range of sanitizers and disinfectants during the Covid-19 pandemic and our flagship brand Silvox is recommended by MoHFW to fight the Corona virus.

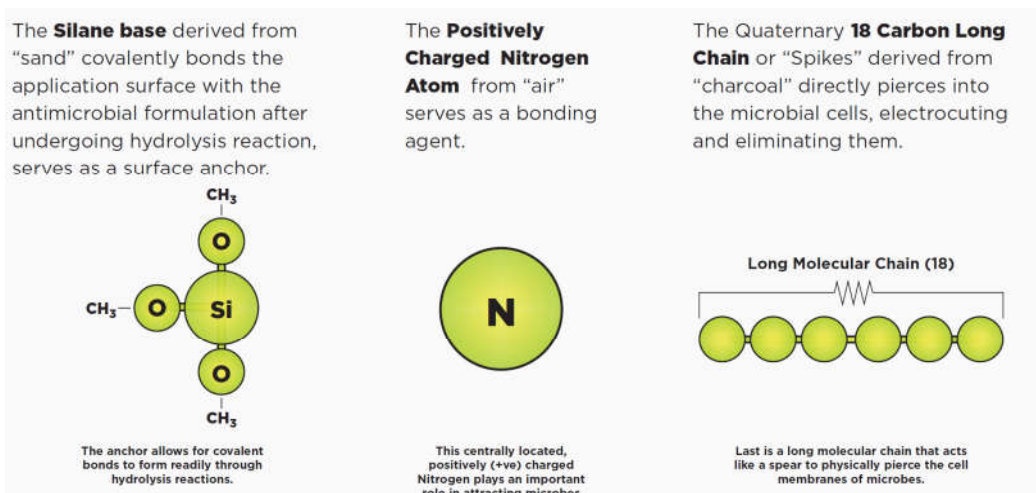

About Chemtex BioBubble Technology and Approvals

We take immense pride to announce that Chemtex is the 1st Indian company and only 6th in the World to have successfully synthesized the molecule of USEPA approved formulation of Quaternary Silane using "Retentive Silane technology"

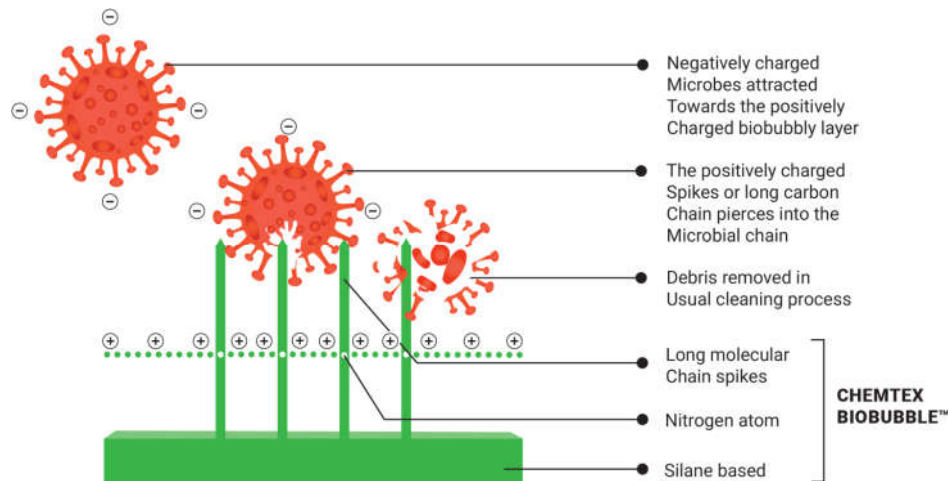

This retentive formulation once effectively deployed forms a Bio bubble over surfaces protecting them for 90 days against the deadly virus.

How it Works?

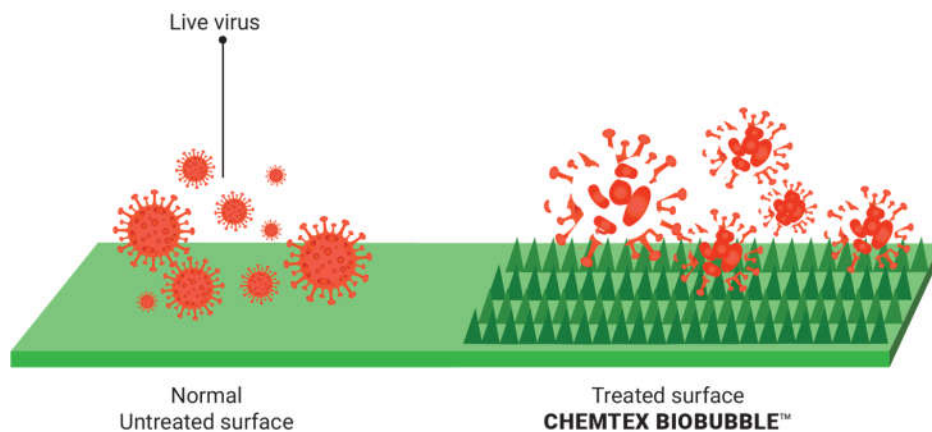

Each Chemtex BioBubble Quaternary Silane molecule is categorized in three parts, each having its own working mechanism

Chemtex Biobubble takes a preventive approach, forming a cationic layer on the application surface which acts like a series of “spikes” that pierces through the microbial cell membrane on contact. The layer remains intact for a considerable period of time and keeps on its antimicrobial performance for the same.

This defensive bubble layer remains intact for longtime and keeps on its antimicrobial performance for this period.

Technology and Product Approvals

This technology is also registered by US EPA (United States - Environmental Protection Agency) under registration no. EPA 739-R-07-007, and has been the only proven technology for Surface Anti-Virus Coating. Once a surface is coated with Chemtex® BioBubble™ then there is no need of Daily Disinfection.

Chemtex BioBubble is tested as per EU standards of EN-13697 and effective at over 99.9% germs including enveloped virus protection for 90 days.

Chemtex BioBubble has been tested for high Antimicrobial Efficacy by NABL accredited laboratory as per Indian standard IS 5402.

Chemtex BioBubble has been tested and Certified as SAFE and Non-Toxic for ingestion as per LD50 test as per OECD 203 Guideline by FDA affiliated Toxicology Centre.

BioBubble Anti-Virus Coating Service

BioBubble Anti-Virus Coating Service is a professionally curated 90 days AntiVirus surface coating service with Chemtex BioBubble Coat 90D. It is 100 times more effective than a Regular Sanitization Service which is just a Curative treatment and does not provide any Prevention of Germs and Virus on the surface. The following graph demonstrates this difference

Upon application of Chemtex BioBubble with Chemtex effective deployment technology (CEDT) a transparent coating is formed which protects the surface and prevents the surface transmission of disease.

We will be the only Indian company to issue virus free zone stickers and certificates on effective deployment to the customers.

BioBubble Extended care range

We are the only company to extend this powerful technology to create products that will bio bubble you as you walk through your normal life in such challenging times

Under the range of Chemtex BioBubble, there are 4 products, which can be directly purchased by end-user and used with ease and comfort. These are sold Over-The-Counter (OTC), Institutional selling, Corporate Selling and also selling through Online Ecommerce platforms.
